Educators are transforming their classrooms with digital tools that are paramount for teaching 21st century skills. This course prepares educators to use online tools for collaboration, visual thinking, multimedia production, productivity and assessment at the higher levels of SAMR.

Participants will explore multiple tools in each category and the pedagogy of use in the classroom. The instructor will guide you through the process of selecting which ones best integrates technology into your learning environment in a transformative way.

This 7-week course opens October 21st and closes December 6th. You can take the online course on your own time during the specified week.

Weekly course topics
